AutoSock – Unique Grip on snow and ice

V 5121

GEPRÜFT
 N 2008 087

AutoSock achieves grip on snow and ice through a unique understanding of how to handle a film of water between tire and surface. Practically AutoSock combines dynamic features of the sock with material technologies such as surface pattern and fiber types. Grip is achieved by utilizing a coarse surface pattern with a fiber that produces hairs. Together they make an area of little water and thereby sufficient grip.

This breakthrough understanding of water management for tires on snow and ice has influenced the traditional thinking of the automotive industries and regulatory authorities. AutoSock AS is today the only official supplier of traction solutions made of fibers to 15 car manufacturers in Europe and Asia.

AutoSock AS is furthermore approved by the leading Austrian Ö-Norm institute (Ö-Norm 5121) and TÜV SÜD (Germany) as an anti slippery traction device and snow chain equivalent. In parallel Colorado Department of Transportation (US) has approved AutoSock as a traction device to be used on heavy trucks in mountain areas.

AutoSock® is an official supplier to leading car manufacturers

⊕AutoSock
 ...brings you home!

Lauterbach EBC/0801

⊕AutoSock
 ...brings you home!

AutoSock® – the simple solution to maximise friction on snow and ice. And the secret: high-performance fibers! AutoSock® is a textile tire-cover that is:

- ⊕ A perfect temporary winter aid for vehicles
- ⊕ Quick and easy to fit and remove
- ⊕ Proven to enhance cars' electronic safety systems
- ⊕ Reusable
- ⊕ Approved by leading car manufacturers

The AutoSock® product is protected by European patent No. 1.165.329.

Leading car magazines and newspapers in Europe and Asia have been impressed by AutoSock®:

- “So easy that it is fun”
- “Self-explanatory - you don't even have to read the user manual”
- “Better than expected on ice and snow”
- “Take the opportunity to try it yourself!”

AutoSock® is approved and certified by TÜV.
